

Anani Thierry Kassa . Jarvis Consulting

Highly skilled Software Developer with certifications in Oracle Java SE 8, Microsoft Azure Fundamentals, and Agile-Scrum. I have seven years of experience in business application design and website development. Proficient in Java, Angular, and Spring boot, I have successfully contributed to the development of the Obor Desk web-based trading application, resulting in increased trade volume and reduced latency. With a strong technical skillset, expertise in database management, and fluency in multiple languages, I am a self-motivated and adaptable team player in delivering innovative software solutions.

Linux Cluster Monitoring Agent [GitHub]: Managed a Linux cluster of 10 nodes/servers running CentOS 7 used by the Jarvis Linux Cluster Administration (LCA). These servers are internally connected through a switch and able to communicate through internal IPv4 addresses. The functionality of the project is to record the hardware specifications of each node and monitor node resource usage (e.g. CPU, memory) in real-time. The collected data is stored in an RDBMS. The LCA team will use the data to generate reports for future resource planning purposes (add or remove servers).

Core Java Apps [GitHub]:

- Twitter App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- JDBC App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.
- Grep App: Curabitur laoreet tristique leo, eget suscipit nisi. Sed in sodales ex. Maecenas vitae tincidunt dui, et eleifend quam.

Highlighted Projects

OnlineStore [GitHub]: This project is an online store allowing a customer to get registered and proceed with purchases. The technical aspect used is Java OOP concepts, Dependency Injection, and other functionalities such as registration, list of products, and credit card use to checkout.

MovieLovers [GitHub]: This project is created to display movies and ratings. If you are a movie lover, you need to get registered through the application and then have access to the list of movies rated at the top. The project is built with Angular and implemented two-way data binding, dependency injection, and modular architecture. All these aspects are thoroughly handled in detail. As a web application Html, SCSS, and JavaScript are part of the development as well.
